Membuat Component Header footer

```
'use client'

import Link from "next/link";
import { usePathname } from "next/navigation";

export default function Navbar() {
  const pathname = usePathname();

  const linkclass = (path: string) =>
    pathname === path ? "text-blue-500 font-bold" : "text-black";
  return (
    <nav style={{ display: "flex", gap: "1rem", padding: "1rem" }}>
      <Link href="/" className={linkclass('/')}></Link>
      <Link href="/ " className={linkclass('/ ')}></Link>
      <Link href="/ " className={linkclass('/ ')}></Link>
    </nav>
  );
}
```

```
import Image from "next/image";

export default function Header() {
  return (
    <header style={{ backgroundColor: '#f3f3f3',
padding: '1rem',
display: 'flex',
}}>
      <Image src="/warmaskin.png" alt="WARMASKIN Logo" width={50} height={50} />
    </header>
  );
}
```
